THE LIGHTEST WHEEL IN THE MARKET

18kg

Our Lightest Wheel In The Market

- Improved fuel efficiency
- Improved payload
- 10-285 Standard fitment

Accessibility and Appearance

- Large hand holes offer easy access to the valve stem
- Classic style and look
- Superior wheel finishes: LVL ONE® and Mirror Polish

Hub Bore TECHNOLOGY

The new Hub Bore Technology is the latest wheel innovation from the market leader and inventor of the forged aluminium wheel. The Hub Bore Technology reduces hub-to-wheel contact area by up to 64% versus other aluminium wheels on the market, leaving less surface area for corrosion to form. Less corrosion means faster, easier and safer wheel maintenance that will keep your truck on the road and lower your total cost of ownership.

Patent Pending.

The Invention of **MAGNAFORCE®**

Each Alcoa Ultra ONE® Wheel starts with MagnaForce® alloy, the first new alloy change in the wheel market since 1968. Proprietary to Alcoa, MagnaForce®, offers a 17% increase in strength over existing alloys for unmatched strength that delivers unprecedented weight savings.
