We've lightened your load.

ONLY
42 lbs.

Alcoa® LvL ONE®
22.5" x 8.25" Wheel
Latest advanced innovation, manufacturing and engineering.

- At 42 lbs., we’ve lightened your load - 500 lbs.
  - Improved fuel economy
  - Improved payload efficiency

Accessibility and Appearance
- Large hand holes offer easy access to the valve stem
- Classic style and look
- Superior wheel finishes: High Polish and Mirror Polish

Advanced finishes for the world's best wheels.

High Polish
*The superior polish that redefines standard.*

Mirror Polish
*The ultimate polish for the ultimate finish.*

Hub Bore Technology
The new Hub Bore Technology is the latest wheel innovation from the market leader and inventor of the forged aluminum wheel. The Hub Bore Technology reduces hub-to-wheel contact area by up to 64% versus other aluminum wheels on the market, leaving less surface area for corrosion to form. Less corrosion means faster, easier and safer wheel maintenance that will keep your truck on the road and lower your total cost of ownership.

Patent Pending.

HUB PILOT - 10 BOLT HOLES, 285.75MM BOLT CIRCLE, 220.1MM BORE
